EDUCATION

Harbin Institute of Technology Shenzhen (GPA: 86/100) 2017.9 - Now
Master's Degree of Mechanical Engineering Shenzhen, China

Harbin Institute of Technology (GPA: 75.2/100) 2013.9 - 2017.7
Bachelor's Degree of Mechanical Engineering Harbin, China

HONORS

First-class ***scholarship of Harbin Institute of Technology*** 2019, Shenzhen

International Runner-up of ***ICRA 2018 DJI RoboMaster AI Challenge*** [2nd /48 teams] 2018.5, Brisbane, Australia

Best Engineering Award of ***ABU Robocon 2015*** [Top 8 /32 teams] 2015.6, Shandong

National 2nd & Provincial 1st prize of ***National High School Physics League*** [2% /2000+] 2013.10, Harbin

National 2nd & Provincial 1st prize of ***National High School Mathematics League*** [2% /2000+] 2013.9, Harbin

National 3rd & Provincial 2nd prize of ***National High School Biology League*** [10% /2000+] 2012.8, Harbin

MAIN PROJECTS

[Details of all of my projects]

Research on Safety Control of Heavy-Load Robotic Arm for Nursing Task 2018.6 - Now

- Designed **the structure and hardware system** for the 6 DOF heavy-load manipulator;
- Designed ***tactile robotic skins*** and proposed ***a safety control strategy*** based on it *(Submitted one paper)*; [Video]
- Proposed ***two novel torque estimation methods*** for robotic joint (*Submitted one paper*); [Code]
- Researched ***the impedance control algorithms*** based on joint space and task space.

Cooperative Robots with Autonomous Navigation, Recognition and Decision Systems 2017.9 - 2018.5

- Improved ***the robotic chassis & the motion control embedded system***; [Video]
- Designed an ***autonomous localization and navigation system*** (*Submitted one paper*); [Code]
- Realized ***a real-time detecting and tracking system*** based on YOLOv2; [Code]
- Designed ***an autonomous decision-making system*** for the two cooperative robots. [Code]

Research on FDM 3D Printer & Chocolate 3D Printer 2015.9 - 2017.6

- Designed and manufactured ***a FDM 3D printer with printing accuracy up to 0.1mm***;
- Proposed ***a novel extrusion and heating system*** specialized for chocolate printing;
- Solved ***the tricky plugging problem*** by many chocolate melting experiments;
- Co-founded ***a small startup*** and designed a ***3D printing training center*** for a vocational school. [Intros]

INTERNSHIP & EXCHANGE

Robotics Robotics Ltd. (PI Electronics H.K Ltd.) 2017.7 - 2017.8, Shenzhen & H.K.
- Designed the control system of an automatic production line based on CAN-open. Assistant Engineer

Korea Advanced Institute of Science and Technology (KAIST) 2016.7 - 2016.8, Korea
- Contributed to the designing of a robotic system for automotive paint spraying. International Summer School

Harbin Aizhilan Technology Development Co., Ltd. 2016.3 - 2016.6, Harbin
- Designed and Manufactured a capsule powder fluid cut-off valve. Assistant Engineer
